

# MAHDIYAR DELAVARI

FRONT-END DEVELOPER

 MahdiyarDelavari@gmail.com  +98 910 209 8797  [MahdiyarDelavari](#)  [MahdiyarDelavari](#)  Tehran, Tehran

## PROFILE INFO

I'm a Computer Engineering student and Frontend Developer specializing in **React**, **Next.js**, and **modern JavaScript**. With **2+ Years Experience** I build fast, reliable, and visually engaging web applications, focusing on performance, clean architecture, and smooth user interaction. My work blends technical precision with creative UI, delivering interfaces that feel both intuitive and polished.

## EDUCATION

- 2023-2027  
UNIVERSITY OF  
SCIENCE AND RESEARCH
- Bachelor : Computer Engineering

## WORK EXPERIENCE

- FREELANCE** 2024 - PRESENT  
Front End Developer
- Developed responsive web applications using **Javascript**, **React**, **Next.js**, and **Tailwind**. Implemented **GSAP** animations for interactive UI elements. Built custom APIs instead of relying on third-party backends for full control.

## SKILLS

- Html - CSS
- JavaScript
- React JS
- Next JS
- Tailwind
- GSAP
- GIT

## PROJECTS

### Apple iPhone 15 Pro Showcase

A sleek, animated landing page built with **React**, **Vite**, and **Tailwind CSS**, featuring **GSAP** animations, 3D model/video integration, and a responsive Apple-style UI.

[Github Link](#)

### Next.js Image Gallery

A sleek, responsive gallery built with **Next.js**, **TypeScript**, and **Tailwind CSS**, featuring image search via Pexels API, blurred placeholders, and modal previews.

## LANGUAGES

- English
- Persian

### Youtube Clone

An elegant, lightweight YouTube-style frontend built with **React** and **Vite**. It demonstrates a clean component structure, **Tailwind-powered** styling, and integration with the YouTube Data **API** to fetch popular videos, play them with the embedded player, and show recommended content.

# PROJECTS

---

## Nextjs Entrepreneurs

Developed a full-stack **Next.js** application for creating, editing, and browsing startup-idea pitches, featuring **TypeScript**, **TailwindCSS**, **NextAuth** authentication, form validation with **Zod**, and a lightweight **JSON-server** backend.

[Github Link](#)

## Zentry Awwards

Built “zentry-awwards”, a landing-page project showcasing modern frontend skills — designed with responsive layout, clean UI/UX and focused converting structure (**HTML/ CSS/ JS/ React/ Vite/ Gsap/ Tailwind**).

[Github Link](#)

## Social X Landing Page

Built “socialx-landingpage”, a responsive landing page for a social-app using **React ,HTML, CSS** and **JavaScript** — showcasing a clean UI/UX and single-purpose conversion-focused design.

[Github Link](#)

## Cocktail Gsap

A modern cocktail website built with **React** and **TailwindCSS**, featuring smooth **GSAP** animations such as SplitText reveals, scroll-triggered effects, parallax scrolling, and a custom carousel.

[Github Link](#)

## Sushi Shop

Developed “Sushi Man,” a responsive food-delivery UI project built with modern **HTML, CSS**, and **JavaScript**, focused on clean component structure, animations, and fully adaptive layouts.

[Github Link](#)

## Basic Picture Editor

A lightweight image editor built with pure **JavaScript, CSS**, and **HTML**—no frameworks required.
